Master Facility Plan

This Master Plan, a vision for the next decade, provide the long-term district-wide facilities development plan that will allow the College to successfully fulfill the Pledges developed in the Kaskaskia College Strategic Plan 2001 - 06. The College Mission states "Kaskaskia College is committed to student learning and will provide citizens of Community College District 501 meaningful, life-long learning opportunities and experiences."

In addition this plan is a defining moment in the College's history. It includes a number of major components that include infrastructure, construction of new buildings, and expansion of our Education Centers.

While facility planning is an ongoing process that must be continually evaluated, this report identifies future facilities needs for the next five to ten years. This report incorporates the views and ideas provided by members of the Board of Trustees, administration and staff; program assessment; facility utilization and upkeep; and revenue projections that will satisfy the College's current demands and future needs.

Situated on 190 wooded acres, the College's main campus presently consists of four brick and four interim buildings. The College district includes 2,231 square miles and approximately 112,000 residents in a largely rural area in South-Central Illinois. The district boundaries encompass all of Clinton, Marion, and Washington counties. Education Centers are located in Trenton, Vandalia, Greenville, Salem, Centralia (Crisp Technology Center), and Nashville.

The report is divided into the sections of Executive Summary and Drawings. The Executive Summary sections provides a summary of the master planning process and is further subdivided to key elements including: Vision; Building Utilization; Faculty and Staff Surveys; Recommendations and Budget Summary. The Drawings section shows, in graphic form, the projected needs of the College's facilities, with recommendations for remodeling, additions and new buildings. The supporting document used to arrive at the final recommendations, including faculty and staff questionnaires, are on file in the Office of Vice President of Administrative Services.

The Master Facility Planning Committee and the Institutional Planning Committee continue to work developing the annual document based on the Institutional Plan. Considerable input is received from the faculty and staff. Additionally, the Board of Trustees provides valuable information throughout the process.
